## New Delivery Record Set By Gas Co.

Increased use of gas by householders and commercial customers this past winter contributed to three new all time records in quantities of gas delivered, Division Manager E. F. Hawkesworth of the Southern California Gas Company announced today.

"This record gas usage was due to continued low temperatures during much of the winter," Hawkesworth said. "This meant that larger quantities of heating gas were required for personal comfort."

The average customer (domestic and commercial) in Southwest Division used 27.5% more gas this February than

during the corresponding month last year because of the unusually cold weather. This means that, on the average, each customer used 2,637 cubic feet more gas this February than last.
